1. CUSTOMER CONCENTRATION

Finding:

- The largest customer segment is **Retail**, and the largest customer concentration is in **Maharashtra**.

Evidence:

- **Retail** has **62,083** customers out of **1,00,000** customers.
- **Maharashtra** has the highest customer concentration.
- Within Maharashtra, the **Retail segment has 9,341 customers**.
- Retail represents **62.08%** of the overall customer base.

Business impact:

- A large concentration in the Retail segment and Maharashtra creates an opportunity for **targeted retention, acquisition and cross-selling**. However, heavy dependence on one segment or geography can also increase concentration risk.

Recommended action:

- Develop targeted **retention and acquisition strategies for Retail customers in Maharashtra**, while monitoring concentration across other states and customer segments.

3. CLAIMS EXPOSURE

Finding:

- **Motor** has the highest claim exposure by product, with a total claim amount of **₹25,61,28,284.00**. Among claim types, **Fire** has the highest claim amount at **₹9,96,57,379.00**.

Evidence:

- Highest claim amount by product : **Motor - ₹25,61,28,284.00**
- Highest claim amount by claim type : **Fire - ₹9.96,57,379.00**

Business impact:

- Motor has the highest overall claim exposure, which can have a significant impact on profitability. The high Fire claim amount also indicates an area that requires closer monitoring of claim and risk patterns.

Recommended action:

Review the main causes of **Motor** and **Fire claims**, identify loss patterns and strengthen underwriting and claims monitoring to reduce avoidable losses.

2. PRODUCT VALUE

Finding:

- **Motor** has the highest policy volume, while **Commercial** generates the highest total premium.

Evidence:

- **Highest policy volume:** Motor - **38,015 policies** out of 1,00,000 which is **38.02%**.
- **Highest premium:** Commercial - **₹2,358,524,154.00**.

Business impact:

- Motor has the highest number of **policies**, but **Commercial** generates the highest premium. This shows that **more policies do not always mean more revenue**. Management should therefore consider both **policy volume and premium value** when making product decisions.

Recommended action:

- **Protect and retain the Commercial portfolio** because it generates the highest premium, while reviewing **pricing, cross-sell** and **customer acquisition opportunities for Motor** to increase the value generated from it's large policy base.

4. CLAIMS SERVICE

Finding:

- Accident claims have the slowest average settlement time.

Evidence:

- Average settlement time for Accident claims = **39 days**, compared with others claims.

Business impact:

- Longer settlement times can reduce customer satisfaction and increase operational workload for the claims team.

Recommended action:

- Review the Accident claims process to identify bottlenecks and prioritize process improvements or additional resources to reduce settlement time.

5. FRAUD / RISK

Finding:

- A total of **220 claims** are classified as high-risk based on the risk criteria. The **Motor product** has the highest high-risk claim amount, while **Theft** is the highest-risk claim type.

Evidence:

- High-risk claim count = **220**
- High-risk claim amount = **₹71,93,286.00**
- Highest-risk product : **Motor** = **₹28,22,556.00**
- Highest-risk claim type : **Theft** = **₹14,78,289.00**

Business impact:

- High-risk claim represent potential financial exposure and require appropriate investigation. The concentration of high-risk amount in the **Motor product** and **Theft claim type** can help management focus risk-monitoring resources where the potential exposure is greatest.

Recommended action:

- Prioritize **high-value/high-risk Motor** and **Theft claims** for investigation and review the recurring risk patterns in these

6. RENEWAL

Finding:

- **Personal Accident** has the highest renewal rate among products, while **Home** has the lowest renewal rate.
- Among channels, **Agent** has the strongest renewal performance, while **Branch** has the weakest.

Evidence:

- **Product** : Personal Accident has the highest renewal rate with **79%**, while **Home** has the lowest renewal rate with **78%**.
- **Channel** : Agent has the highest renewal rate with almost **80%**, while **Branch** has the lowest renewal rate with **78%**.
- **Overall** : **78,168 of 1,00,000 policies renewed (78.17%)**, while **21,832 did not renew (21.83%)**.

Business impact:

- The overall renewal rate of **78.17%** means that approximately **21.83% of policies were not renewed**. The weaker renewal performance of the Home product and Branch channel indicates areas where customer retention may need additional attention.

7. AGENT PERFORMANCE

Finding:

- **Agent_5095** generates the highest premium, while **Agent_5095's renewal rate is 79%**. Agent_5139 has the highest renewal rate at **84%**.

Evidence:

- Highest premium agent: **Agent_5095 — ₹2,63,49,002**
- Agent_5095 policies: **375**
- Highest renewal rate: **Agent_5139 — 84%**
- Agent_5095 renewal rate: **79%**
- Total premium: **₹6,105,756,973**
- Agent_5095 premium contribution: $\approx$ **0.43%** of total premium

Business impact:

- Agent_5095 generates the highest premium, but its **79% renewal rate is lower than the top agent's 84%**. This means there may be an opportunity to improve customer retention while maintaining high premium performance.

Recommended action:

- Recognize Agent_5095's strong premium performance and review the retention practices of Agent_5139 to identify ways to improve Agent_5095's renewal rate.

8. COMPLAINTS

Finding:

- **Claim Delay** is the most common complaint type, while **Policy Cancellation** takes the longest to resolve.

Evidence:

- Total complaints: **12,000**
- Most common complaint: **Claim Delay — 1,759 complaints**
- Open complaints: **1,244**
- Average resolution time: **15 days**
- Slowest category: **Policy Cancellation — 16 days**
- Overall complaint resolution rate: **89.59%**

Business impact:

- A large number of Claim Delay complaints and an open backlog can affect customer satisfaction and retention. Policy Cancellation also needs attention because it has the longest resolution time.

Recommended action:

- Focus on reducing **Claim Delay complaints**, clear the **1,244 open complaints**, and review the Policy Cancellation process to reduce its **16-day** resolution time.

9. CROSS-FUNCTIONAL PRIORITY

Finding:

- Commercial is the highest-premium product and represents a major share of the company's premium portfolio, while also having measurable claims exposure and 1,245 complaints.

Evidence:

- Commercial premium = **₹2,358,524,154**, representing approximately **38.63% of total premium**. Commercial claim amount = **₹67,507,055**, approximately **10.01% of total claim amount** and ranked 3rd among products. Commercial has **1,245 complaints**.

Business impact:

- Commercial is strategically important because it generates a large proportion of total premium. Its relatively smaller share of claim amount compared with its premium contribution is a positive signal, but the complaint volume indicates that customer-service performance should still be monitored.

Recommended action:

Prioritize Commercial for management monitoring by reviewing premium, claims and complaint trends together. Investigate the main causes of Commercial complaints and continue monitoring claims and renewal performance to protect this high-value portfolio.
